

Method and System for Generating a File Containing Graphical Displays from Content Stored on a Computing Network Location

Abstract of the Disclosure

5

The method of the present invention provides a user with the ability search or navigate through a presentation slide repository, select slides that the user desires, download the selected slides to a file at the location of the user and convert these slides into a slide presentation format using a slide program such as PowerPoint®. In this method, the navigation and download slide steps can be performed in a browser on a computer network environment. The conversion and display function can be performed with software located in the user machine optionally in combination with server side software.
